Julio Saito

Senior Software Engineer
Ubatuba, São Paulo, Brazil

Summary

Senior Software Engineer with vast experience (20+ years) in TS, Node.js, React and Cloud. A TypeScript specialist, I leverage Spec-Driven Development (SDD) extensively to build highly functional and complex software. I have a strong background in leading critical development initiatives and making key technical contributions to high-impact projects. My expertise spans from architecting large-scale systems to implementing agile serverless solutions. Currently, I'm enthusiastic about and focused on integrating AI as a strategic ally. I adopt a methodical and structured approach to "pilot" AI, ensuring clear context and taking responsibility for final validation, all while aiming for innovation and effective complex problem-solving. I am seeking challenges where I can combine robust experience with the technological forefront. projects:- Achorde: <https://achorde.com/>- SVGuitar React: <https://svguitar-react.vercel.app/> and <https://storybook-svguitar-react.vercel.app/?path=/docs/components-chorddiagram--docs-> Game made with matter-js and typescript (AI experiment): <https://saitodisse.github.io/matter-js-experiments/>- Recipes Repository Library: <https://recipes-repo.vercel.app/>

Experience

Soma Deals

Senior Software Engineer
August 2025 - Present (10 months)
São Paulo, Brazil

At SoM&A, I am part of the team responsible for developing a digital M&A platform for SMEs, the largest and most complete in Brazil. My role is crucial in creating tools that simplify the process of buying and selling businesses. As a full-stack developer, I use Next.js and TypeScript for the front-end, and I manage the Python backend and AWS infrastructure, ensuring the platform is secure, intuitive, and technologically advanced for business owners and industry professionals.

Linx Commerce

Solutions Architect

December 2021 - June 2024 (2 years 7 months)

São Paulo, Brasil

- Led development of innovative WhatsApp customer service system at Linx Commerce, integrating product listings, virtual cart, and dynamic conversation flows.
- Served as Senior Developer, Product Owner and Scrum Master, focusing on requirements gathering and simplifying architecture for other team members.
- Migrated architecture from Kubernetes to Vercel/AWS Cloud Functions for scalability and optimized PostgreSQL on Google Cloud.

Semantix

Senior Web Developer

November 2020 - December 2021 (1 year 2 months)

São Paulo, Brasil

In my role as a Senior Web Developer at Semantix in São Paulo, Brasil, I spearheaded the implementation of live-shopping and intelligent-chat features, leveraging VTEX and dialog-flow technologies. I also collaborated on open-source projects in Next.js to enhance website functionality and user experience.

Latife Gastronomia Árabe

Dev at family business

February 2017 - November 2020 (3 years 10 months)

São Paulo e Região, Brasil

- Managed all IT operations for Latife Gastronomia Árabe, a family business specializing in Arab food, utilizing technologies like Typescript, Next.js, Hasura, and more.
- Implemented project organization using Trello and Github projects to streamline workflow efficiency.
- Maintained servers on AWS, Heroku, and Google Cloud Computing, with a focus on Vercel for simpler tasks.

Azuki (azukiapp.com)

Software Engineer

October 2014 - November 2016 (2 years 2 months)

São Paulo

At Azuki, a company developing cloud computing solutions, I significantly contributed to the development and strategic planning of AZK, their flagship

open-source CLI tool. AZK was designed to automate the setup and management of development environments, functioning as a precursor to docker compose. My responsibilities included the internal development of the AZK tool using NodeJS, managing community support to help developers use and contribute to the project, and assisting in the overall management of the open-source project to ensure a smooth workflow. I applied TDD practices to ensure the quality and reliability of AZK. My skills in this role include NodeJS, API Development, Open-Source Development, Community Support, Containerization, and Docker.

Integgro Tecnologia da Informação

Web Developer

2013 - 2013 (less than a year)

- Developed web applications using Asp.Net MVC and JavaScript at Integgro Tecnologia da Informação.
- Implemented a continuous integration server that has been running smoothly since then.

Grupo SHC

programador e instrutor

March 2006 - September 2012 (6 years 7 months)

Projeto: Apollo – Desenvolvedor (Arquiteto técnico)

Definiu quais tecnologias, técnicas e procedimentos foram utilizadas na construção do maior projeto de software próprio desenvolvido pelo Grupo SHC - Apollo Web, no segmento de venda e pós venda de veículos. Atuou ativamente na criação e no manutenção do site. Optou por utilizar o Asp.Net, banco de dados SQL SERVER, repositórios NHibernate e SAP e IOC container Castle Windsor. Programação orientada a objetos seguindo as melhores práticas das camadas sugeridas pelo DDD. Uso de testes unitários com NUnit + Moq e Selenium para testes de interface web. Realizou vários treinamentos técnicos. Utilização de vários projetos open-source como: Moq, jQuery, Ninject, knockout.js, log4net, AutoMapper, NVelocity e FluentNHibernate. Comunicação com SAP via Theobald Software GmbH: ERPCconnect. Criador e mantenedor do servidor de integração contínua utilizando TeamCity, Rake e Albacore. Criação de um wiki e um blog para difusão de conhecimento.
